Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 8-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Bacho '750. Bacho discloses a rake stripper (figures 1-8) comprising a cleaning member (generally 6) comprising hollow 5 and solid (bracket, 4) cleaning elements which are telescopically mated (as seen in figures 1 and 3) and having adjustment means for allowing the elements to be extended and retracted (lines 67-71) to fit a wide variety of rakes. Further, Bacho shows the stripper having a biasing means (10,11 and 14-17) for biasing the cleaning member towards a retracted position (as seen in figure 1) and locking buttons (14,15).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bacho '750 in view of MacGregor '566. Bacho discloses the claimed device substantially as discussed above but fails to show the biasing means being a unitary, cantilevered spring and support. However, MacGregor discloses that it is well known to employ such a spring and support (figures 1-7) in concert with a rake stripper. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide the device of Bacho with the teachings of MacGregor in order to provide a stripper having less parts and therefore greater ease of manufacture and use.
